## Projects

---

### Social Media Web Application [\[Link\]](#)

[Github](#)

*Next.js, React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, Multer, PDFKit*

- Developed a scalable full-stack social media platform using **Redux-based global state management**, enabling **user discovery and connections**, interactive engagement through **likes and comments**, and secure **post CRUD operations**.
- Built secure **RESTful APIs with JWT authentication**, implementing ownership validation and middleware-driven access control to protect routes and maintain data integrity.
- Implemented dashboard and profile features including post updates, work experience management, **resume generation & PDF download (PDFKit)**, and secure media uploads with **Multer**.

### Video Conferencing Web Application [\[Link\]](#)

[Github](#)

*MongoDB, Express.js, React.js, Node.js, WebRTC, Socket.io*

- Developed a **real-time peer-to-peer video conferencing web application** with live audio/video calling, **screen sharing**, and **real-time chat features**.
- Implemented **JWT-based authentication** to securely handle user login and authorized access to meeting rooms.
- Integrated **WebRTC-based peer-to-peer communication** with **socket-based signaling** for low-latency streaming, messaging, and meeting event management.

### WanderLust (Full Stack Web Application) [\[Link\]](#)

[Github](#)

*Node.js, Express.js, MongoDB, EJS, Bootstrap, Joi, Multer*

- Developed a full-stack travel stay listing platform inspired by Airbnb, enabling users to **create, view, update, and delete property listings**..
- Designed and implemented **RESTful APIs for creating, updating, editing, and deleting listings**, storing property data such as title, description, price, location, and images in **MongoDB**.
- Integrated **Joi-based validation and centralized error-handling middleware**, and built a **responsive user interface using Bootstrap**.

## Skills

---

|              |                                                                                |
|--------------|--------------------------------------------------------------------------------|
| Languages:   | C, Java, JavaScript, SQL                                                       |
| Development: | HTML, CSS, React, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Redux |
| Databases:   | MongoDB, MySQL                                                                 |
| Tools:       | Postman, VS Code, Git, GitHub                                                  |

## Education

---

**Baderia Global Engineering College Jabalpur**  
*Bachelor of Technology in Computer Science and Engineering*

**K.R.B. Higher Secondary School, Kareli**  
*Higher Secondary (12th)*

**2023 - 2027**  
**CGPA: 6.7**

**2022 - 2023**  
**Score: 87.0%**
