

AYUSH NEMA

+91 9407004701 | nemaayush22@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Web Developer with expertise in React.js, Next.js, Node.js, and MongoDB. Experienced in building scalable web applications, secure RESTful APIs, JWT authentication, real-time systems with WebRTC and Socket.io, and AI-powered features.

TECHNICAL SKILLS

Languages: C, Java, JavaScript, TypeScript (learning), SQL

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Bootstrap, Redux Toolkit

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, WebRTC, Socket.io

Databases: MongoDB, MySQL

Tools: Git, GitHub, Postman (API Testing), VS Code, Multer, PDFKit, Vercel, Render

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | [Techwalaa](#) | Feb 2026 – May 2026

Remote, Delhi | Next.js, React.js, Node.js, MongoDB, Tailwind CSS

- Engineered **15+ reusable UI components** for a production vendor dashboard using Next.js and Tailwind CSS, cutting development time by **~30%** and ensuring consistent cross-device rendering
- Designed and integrated **RESTful APIs** for real-time inventory sync between vendor dashboard and Node.js/MongoDB backend, reducing manual data refresh cycles to **zero**
- Delivered **3 major product modules** end-to-end within first 2 months, contributing directly to the platform's **initial production release**

Front-End Engineering Simulation | [Skyscanner × Forage](#) | Nov 2025

Virtual | React.js

- Built a **production-ready Backpack React Web App** using Skyscanner's open-source design system with **5+ reusable components** following component-driven best practices

PROJECTS

Social Media Web Application [GitHub](#)

Next.js, React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, Multer, PDFKit

- Architected a scalable full-stack social media platform with Redux state management and **18+ secured RESTful APIs** — covering auth, posts, connections, and comments with JWT ownership-level access control
- Integrated **automated PDF resume generation** (PDFKit) and secure Multer media uploads, reducing profile setup time by **~60%**
- Enforced **middleware-driven route protection** with centralized error handling across all 18+ routes — ensuring **zero unauthorized access** in QA testing

AI-Enabled Video Conferencing with Personal Notes (Joinfy) [GitHub](#)

MongoDB, Express.js, React.js, Node.js, WebRTC, Socket.io, Speech-to-Text, Generative AI

- Engineered a **real-time P2P video conferencing platform** with live audio/video, **screen sharing**, **in-meeting chat**, and **meeting history** — achieving **<200ms latency** via WebRTC and Socket.io signaling
- Integrated an end-to-end **Generative AI pipeline** — live meeting audio transcribed via **Speech-to-Text**, fed into a **GenAI model** to auto-generate contextual summaries delivered to late joiners instantly upon joining the call
- Built a **client-side Personal Notes panel** with write, **one-click download**, and **clear** functionality using **localStorage** — ensuring zero backend dependency and fully private per-user note management across sessions

WanderLust — Travel Stay Listing Platform [GitHub](#)

Node.js, Express.js, MongoDB, EJS, Bootstrap, Joi, Multer

- Developed a full-stack Airbnb-inspired platform with complete CRUD, Joi schema validation, and centralized error middleware — **zero unhandled exceptions** in production
- Integrated **Multer-based image upload** with responsive Bootstrap UI, achieving **100% mobile-compatible** rendering across all tested devices
- Structured clean **RESTful API routes** for listing management with proper HTTP semantics and validation at every layer, ensuring **consistent data integrity**

EDUCATION

Baderia Global Engineering College, Jabalpur | 2023 – 2027

Bachelor of Technology in Computer Science and Engineering
